

Migrants and Minorities

Bridging the Gap?!

Nr. 1 Thinking about migration

a)

- Coming from...
 - Syria
 - Afrika
 - Iraq
 - Afghanistan
- Reasons:
 - Poorness
 - Wars
 - Dictators
- They travel by / in ...
 - Small boats over the Mediterranean Sea
 - Small trucks driving over the borders (Turkey)

b)

One big problem is that many refugees are stuck in huge camps in Greece. Nobody can really care about those persons if they get the corona virus. Because there are so many people on just a relatively small area this dangerous virus can spread extremely fast.

Nr. 2 Working with visuals

a)

There are two pictures really shocking me:

The first one is the bottom left picture on the first page. It is showing three white boys with each holding a sign in front of them. One sign says, "We won't go to school with Negros". Another says, "We students ... don't want Negros in our school" and on the third you can read "Strike against Negros ...". This photo really affects me because those boys are already hating students that theoretically could be as clever and friendly as themselves (For the record: To me the three boys do not seem friendly). But in practice black people can't be as clever as white people if they may not go to school or if they are extremely bullied by white boys, who think the planet belongs to them and that not everybody should have the same rights. This unfairness but also the boys misunderstanding that everybody deserves to go to school makes me feel sad but at the same time angry about this picture / these three boys.

The second picture is the top right on the second page:

I really cannot understand why (some) policeman especially in the USA still trade dark people as animals as a species of a lower level. This also makes me angry and thinking of what people have (not) learned over time.

b)

The fact that the pictures on the second page are coloured means that racism is still a huge problem in our time.

Nr. 3 superdiverse societies

a)

Superdiverse society meant that in a country many different cultures are living close together every bringing its own kitchen, languages, faiths, etc. This means to a country being very carefully with laws to not discriminate one culture as part of the society and trying to create interfaces between those variety of cultures.

b)

+	-
Diversity: people can try out different food etc	Other understanding of laws
New experience (from other cultures)	racism
